THE CHILDREN.

Nauseous and bad-tasting medicine is objectionable to adults and a horror to children. No doubt its frequent lack of good effect is, at least partly due to the disgust it excites in them—the shock to the system. This is especially true of Cod Liver Oil, in the form of the ordinary old-fashioned mixtures so often forced upon the terrified and helpless children. A most marked contrast is *Wampole's Preparation*, which, although it contains all the curative and flesh-producing properties of Cod Liver Oil, is entirely free from its taste, odor and appearance. In combination with this drug are the Hypophosphites Compound and the Extracts of Malt and Wild Cherry Bark. In building up pale, puny, emaciated children, particularly those troubled with Anemia, Scrofula, Rickets, and Bone and Blood Diseases, nothing equals the Preparation. Its tonic qualities are of the highest order. It creates new blood, strong muscles, sound teeth, solid bones, and enables them to grow up into healthy men and women, for cures made in the young are economical and permanent. It is a product of modern study and science. Druggists everywhere sell it.

This is only a small advance over Chicago prices. No use of having old furniture in the house when you can buy new at this figure. Think again!

The prettiest thing in the couch line is covered with a portierre. You've seen them before, and thought them expensive. What do you think of a
